Dear Members Of The Transportation Committee

Please be advised that i have been a resident of Olmstead Place Norwalk Ct. for 45 years ,my home is approx 400 feet from the cul-de- sac and approx 600 feet from I 95 north .Since i have been a resident myself & my neighbors have never had sound barriers to protect us from pollutions and noise that we receive daily from the traffic on I95. What makes it even more frustrating is there are sound barriers along I95 (south) from Westport thru Norwalk that have been installed approx 25 years ago. Also while driving southbound thru Darien and thru Stamford there are barriers on both sides of I95 there is a project going on now in Darien between exits 11 & 13 and a newer type of barrier is being installed the older type barrier were taken down due to construction. This is also the case in Stamford awhile ago along exit 9 . What i can not understand is why can't we have sound barriers protecting the residents of Olmstead Place & Knickerbocker Rd. ? I would estimate the length needed would be approx one quarter a mile of barriers that would be from exit 16 to the Strawberry Hill overpass. I would like to thank you for your time and consideration concerning this matter

Respectfully  
Demetrius M Armone
